

TOP REASONS WHY

1

Customer Satisfaction

Building top quality, affordable trailers is our daily mission; exceptional user experience is our goal. Customer satisfaction is our top priority.

2

Safety & Security

Hinge covers on all doors, bright LED clearance & loading lights, superior towing characteristics, radial tires with 24/7 emergency roadside assistance* all mean safer towing and loading.

3

Rust & Corrosion Resistant

Our SuperLock unique proprietary interlocking aluminum exterior system has fewer exposed screws. Our rugged, aluminum frame resists unsightly rust and corrosion.

4

Interior Protection

We use every precautionary step to ensure your trailer is free of leaks. Automotive seal on doors creates a barrier that blocks out dirt, grime, and moisture. Every trailer is inspected at crucial points. Trailer contents stay clean and dry.

5

Innovative Solutions

We seek to constantly improve our production, materials, and processes like our .030 interlocking exterior aluminum, nitrogen filled radial tires, aluminum door hold backs, LED lights and much more.

6

Stronger, More Durable - Lasts Longer

Interlocking exterior panels are also glued and screwed, double hollow tube and I-Beam frame, aluminum door hold-backs, 3" aluminum top and bottom trim, integrated tongue, tubular roof bows, and more.

7

Superior Towing Characteristics

Our trailer tongue is welded into the frame, not bolted on underneath for greater stability, strength and superior tracking. Our radial tires resist flats and pressure loss for better towing safety and confidence.

8

Exclusive High-Performance Radial Tires

Exclusive high performance radial tires inflated with nitrogen for more reliable pressure with less risk of blowout and tire damage from oxidization common in air filled tires.

9

Value for the Long Haul

Top quality materials and components, a commitment to excellence and innovation, robust quality control, warranty protection, lasting performance - all at an affordable price!

10

Exceptional Owner Experience

All this means fewer hassles and an exceptional user experience. Plus you have the confidence of knowing your warranty is secured by the financial strength, stability and outstanding reputation of Forest River Inc., the largest trailer manufacturer on the planet.

*The 24/7 emergency roadside assistance program on our steel belted tires requires you to have an available spare with you at time of service.
